

MOVEMENT FOR
GENERAL GOODGifford Pinchot's Opinion on
Conservation.

TALKS AT ST. PAUL MEETING

Former Chief Forester Says That the One Great Obstacle to Practical Progress Lies in the Political Power of the Special Interests, Which Desire Private Profit.

St. Paul, Sept. 9.—The principal speech of the last day's session of the National Conservation congress was made by Gifford Pinchot, deposed chief forester. His subject was "The Conservation Programme" and he said, in part:

Like nearly every great reform conservation first passed through a period of agitation and general approval. During this period it met with little opposition, for as yet it interfered with no man's private profit. From the beginning of the world the preaching of righteousness in general terms has been contemplated with entire equanimity by the men who rise in violent protest the moment their own particular privilege, graft or advantage, comes practically into question. That protest marks the second phase of the reform.

Within the last two years conservation has passed out of the realms of an unimpeachable general principle into that of a practical fighting attempt to get things done. It has begun to step on the toes of the beneficiaries and the prospective beneficiaries of unjust privilege and the resulting opposition, considering the quarters whence it comes, is one of the best of proofs that conservation is a live movement for the general good.

Special Interests Fight Idea.

When the conservation movement began to tell it developed without delay that the one great obstacle to practical progress lay in the political power of the special interests. Every effort to conserve any natural resource for the general welfare was met by the legislative agents of the men who wanted to exploit it for their private profit. The efforts to get things done in conservation taught us clearly, unmistakably and with little delay that so long as the political domination of the great business interests endures their corrupt control of legislation will carry with it the monopolistic control of the natural resources also. This is what we face today in the effort to apply conservation.

The fundamental principles of conservation are few and simple. One of the first is this—that the natural resources and natural advantages belong to all the people and should be developed, protected and perpetuated directly for the benefit of all the people, and not mainly for the profit of a few.

Another is that the natural resources still owned by the people which are necessities of life, like coal and water power, should remain in public ownership and should be disposed of only under lease for limited periods and with fair compensation to the public for the rights granted.

As to Our Waters.

First—Every stream should be made useful for every purpose in which it can be made to serve the public. The preparation of a broad plan is needed without delay for the development of our waterways for navigation, domestic supply, irrigation, drainage and power.

Second—Every power site in state or federal control should be held so and should be disposed of only under lease for a limited time and with fair compensation to the public.

Third—In the development of our waterways the co-operation of the states with the nation is essential for the general welfare.

As to Our Forests.

First—All forests necessary for the public welfare should be in the public ownership, such as the national forest already in existence, the proposed Appalachian and White Mountain national forests and the state forests of New York, Pennsylvania, Wisconsin and other states.

Second—The protection of forests against fire is the first duty in forestry of states and nation alike. The way to stop fires is to get men to them as soon as they begin. The maintenance and extension of forest fire patrol by the nation, the states and their subdivisions, and by associations or private citizens who own timber lands, is absolutely necessary.

Third—The protection of existing forests by wise use is the first step in forestry. Reforestation is the second.

Fourth—Land bearing forests should be taxed annually on the land value alone and the timber crop should be taxed when it is cut, so that private forestry may be encouraged.

Fifth—The private ownership of forest land is a public trust and the people have both the right and the duty to regulate the use of such lands in the general interest.

As to Our Lands.

First—Every acre of land should be put to whatever use will make it most useful to all the people.

Second—The fundamental object of our land policy should be the making

and maintenance of permanent, prosperous homes. Land monopoly and excessive holdings must not be tolerated.

Third—Settlement must be encouraged by every legitimate means on all land that will support homes. Thus the tillable land in public ownership within and without the national forests should be disposed of in fee simple to actual homesteaders, but not to speculators.

Fourth—The first and most needy thing to do for our cultivated lands is to preserve their fertility by preventing erosion.

Fifth—The nonirrigable arid public grazing lands should be administered by the government in the interest of the small stockmen and the homemaker until they can pass directly into the hands of actual settlers.

Sixth—Rights to the surface of the public land should be separated from rights to the forests upon it and the minerals beneath it and each should be held subject to separate disposal. The timber and stone act should be repealed.

As to Our Minerals.

First—Those still remaining in government ownership should not be sold, but should be leased upon terms favorable for their development up to the full requirements of our people. Until legislation to this effect can be enacted temporary withdrawals of land containing coal, oil, gas and phosphate rock are required in order to prevent speculation and monopoly.

Second—It is the clear duty of the federal government, as well as that of the states in their sphere, to provide, through investigation, legislation and regulation, against loss of life and waste of mineral resources in mining. The recent creation of a national bureau of mines makes a real advance in the right direction.

Regarding National Efficiency.

First—The maintenance of national and state conservation commissions is necessary to ascertain and make public the facts as to our natural resources. Such commissions supply the fundamental basis for co-operation between the nation and the states for the development and protection of the foundation of our prosperity.

Second—A national health service is needed to act in co-operation with similar agencies within the states for the purpose of lengthening life, decreasing suffering and promoting a vigor and efficiency of our people.

These are not all the things for which conservation stands, but they are some of the more important.

Hiding Behind States' Rights.

In the effort to conserve our natural resources we recognize that combinations against the public welfare which extend beyond state lines can be met effectively only by agencies equally capable of operating across such boundaries. It is clear that the control of interstate commercial power is possible only by the use of interstate federal power. We are opposed to the extension of state jurisdiction at the expense of real control by the people over monopoly as in the case of water power.

While I do not believe that the state alone can carry out the conservation programme in the face of interstate attacks upon it I do not fail to recognize the great and useful part which the states must play in this great movement for the permanent welfare of all our people. Also I appreciate now, as I have always done, that in much of the work ahead co-operation between the states and the nation is an essential condition of success. But when I see the special interests attempting to take refuge behind the doctrine of states' rights I propose to speak out and say so.

Storm Wrecks Schoolhouse.

Pine River, Minn., Sept. 9.—High winds, pronounced by some a tornado, destroyed the Ruscoe schoolhouse, seven miles north of here, strewn pieces of the building from its site to Lake Hattie, sixty rods away. Farmers' fences were strewn about promiscuously.

Minnesota Man Killed.

Anoka, Minn., Sept. 9.—Fred Linn, son of Mr. and Mrs. E. G. Linn, met death by falling from an electric light pole in Ellensburg, Wash. He was twenty-four years old and went West a few years ago.

Flour Mill Burns.

Tama, Ia., Sept. 9.—The flour mill of Smith & Son was destroyed by fire of an unknown origin. Other buildings nearby had a close call from destruction and several different times the Kenyon pump factory was ablaze.

Pioneers at State Fair.

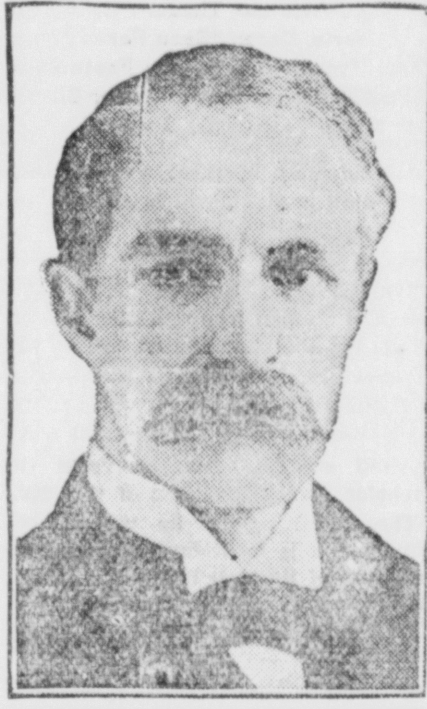

St. Paul, Sept. 9.—The territorial pioneers were the center of attraction at the fair grounds, where they held open house in the log cabin on Underwood avenue. Over 45,000 people paid their admissions to the grounds.

Both Sides.

Johnnie—What does it mean by "seeing the humorous and the serious side of things"? Father—Well, my son, take a bit of orange peel, for example. How many sides has it? Johnnie—Why, two, of course. Father—Exactly. And when some other man steps on that orange peel he sees the serious side of it and you see the humorous side.

GIFFORD PINCHOT.

Delivers an Address at Conservation Congress.

REPUBLICANS OF
NORTH DAKOTAEndorse the Administration of
President Taft.

Bismarck, N. D., Sept. 9.—At the meeting of the Republican state committee held here the following officers were elected:

Frank Halcott, Buffalo, chairman; Joe Devine, Grand Forks, secretary; E. G. Wanner, Valley City, treasurer; executive committee, Bartlett David, Cooperstown; J. A. Buchanan, Buchanan; J. D. Bacon, Grand Forks; J. F. Callahan, Casselton; P. J. McClory, Devils Lake; J. T. Shea, Wahpeton; Joseph Roach, Minot; J. A. Johnson, Bottineau; J. G. Quinley, O. T. Rishoff, Milton; W. H. McMasters, Mofish.

The above executive committee, with the three officers named first, will act as the executive committee of the whole and act as campaign managers. The platform was adopted in full as read, endorsed the Republican national platform of 1908, favored protection of the farmers and laborers, recognized the Payne tariff law as not a perfect bill and favors a readjustment of the tariff by considering the various schedules separately; recommends the establishment of an independent permanent and non-partisan tariff commission; endorses the administration of William H. Taft; congratulates Roosevelt for arousing the conscience of the people to a sense of civic righteousness; favors federal control of corporations doing interstate business and preventing the issuance of stocks and bonds by such companies beyond the real value of their assets and forbidding them from purchasing stock in competing companies; favors nation's conservation of natural resources; favors speedy enactment of federal laws providing an income and inheritance tax; insists that the next legislature establish a permanent and non-partisan tax commission; favors the passage of laws giving the railroad commission more power; favors the initiative referendum and recall; condemns the inconsistency of the present executive of the state in the exercise of veto power and the use of public patronage toward political henchmen and reminds Republican voters that the election of a Democratic governor resulted in a Republican state being represented in the senate by a Democrat.

IN A SERIES OF ACCIDENTS

One Killed and Three Hurt by Autos in Minneapolis.

Minneapolis, Sept. 9.—One woman was killed and three men were injured, one of them seriously, in a series of automobile and motorcycle accidents here.

Mrs. C. F. Sandhoss, forty-three years old, wife of the assistant city engineer of Minneapolis, sustained a fractured skull when the runabout in which she and her husband were driving was struck by a street car. Mr. Sandhoss was not seriously hurt.

The second accident, which may result fatally and which is attributed to the aged victim's deafness, occurred when G. S. Kelly, sixty-two years old, was struck by a machine driven by Allan McDonald.

The third collision, which did not prove serious, happened when W. J. Read attempted to cross Washington avenue at Nicollet. An automobile, the number of which the police failed to get, hit him and bore him to the pavement. Read had one ear torn off and sustained painful bruises.

Curved Bridges of Japan.

The curved bridges of Japan are of three kinds—first, those known as spectacle bridges, with an arch in the center suggesting a pair of spectacles; second, the camel back bridges, which go up very high indeed; third, the ordinary one arch, semicircular bridges. The reason the Japanese so often have curved bridges is because until modern times they could not build them flat, and even today there is no key stone to the Japanese arches. They are not generally familiar with the key stone. A great many of two classes of bridges—the camel back and the high curved bridges—are found in the palace grounds at Peking, in China.—St. Nicholas.

CONSERVATION
CONGRESS ENDSLively Session Marks Close of
Meeting at St. Paul.

FEDERAL CONTROL ENDORSED

Resolutions Adopted Advocating Federal Control of Natural Resources. Follow Closely the Ideas of Roosevelt and Pinchot—Henry Wallace of Iowa Elected President.

St. Paul, Sept. 9.—With an overwhelming majority of the delegates standing solidly for federal control in conservation, the second National Conservation congress closed here. The final hours were a turmoil from start to finish, with vigorous speeches from a small but long-powdered coterie of states' rights men from Washington, Idaho and Montana, under the leadership of E. W. Ross, land commissioner of Washington and a staunch upholder of Governor Hay and of Richard Achilles Ballinger.

The federal control policy was so firmly entrenched in power that no amendments were offered and no minority report was submitted to the report of the resolutions committee led by former Governor George C. Pardee of California. This report, giving the platform of principles which will go out to the public as the belief of the national organization of conservationists—the report which more than anything else represents the purpose of the second National Conservation congress in coming together from every nook and cranny of the country—was adopted without opposition. This was something of a surprise. Judge Frank H. Short had declared that he would be on the floor of the convention with a wallop in both hands when the resolutions report was handed down.

Lively Time Anticipated.

Mr. Pardee had shaken his fist at the California judge and representative of Governor Gillett, and announced that he would be on hand with two wallops in each hand; that he wasn't in the way of being "bluffed" by any man from his own state. Also, Governor Hay of Washington had threatened to present with more fight in his system to pay his respects to the resolutions. If Governor Hay was in the Auditorium he kept quiet, considering that his record as a public official was raked over the coals by a delegate from his own state, who was roused into action by the fulminations of Land Commissioner Ross.

When Mr. Pardee reported the resolutions Judge Short got majestically out into the aisle and the hundreds of delegates and visitors lay back in their seats to watch the fireworks. However, the judge said that inasmuch as there was a clause in the report upholding the bearing of the Constitution of the United States on the conservation question he would make no amendment and offer no opposition report. The adoption of the resolutions was then put to a vote and went through with only a few growls from the Western states' rights coterie.

The resolutions advocate federal control of natural resources and follow closely the ideas of Roosevelt and Pinchot.

Pinchot Declines Honor.

The report of the nominating committee went through after an outburst from Mr. Ross of Washington. The office of president of the next National Conservation congress was unanimously offered to Gifford Pinchot by the committee. He declined on the ground that the interests of harmony would be better served with him not in that office. The committee then named Henry Wallace of Des Moines for the place.

Henry Wallace, member of Roosevelt's country life commission and farm journal editor, will head the third National Conservation congress. Thomas R. Shipp, executive secretary of this meeting, will continue in the place. James C. Gipe, assistant secretary of the National Conservation association, was made recording secretary of the next congress. D. A. Lashaw of Kansas City became treasurer.

The nomination of Mr. Wallace was made by Captain J. B. White, chairman of the executive committee. The second was by Gifford Pinchot, who paid a tribute both to the nominee and to Captain White. Then the men were voted through.

Mr. Wallace was given the gavel by Bernard N. Baker, president of the congress just closed, and assumed charge of the session. In his address of acceptance he declared that he would be a national president; that the West had peculiar problems to solve to which the help of the congress should be given; that there would be no factions, if he could help it, and no politics. This taboo on politics was vigorously applauded.

Just before the close of the congress the states were called in order and named their representatives to be vice presidents of the congress next year. These vice presidents will form a body which will take the place of the board of directors provided for at the first National Conservation congress in Seattle.

Easy Enough.

Happiness would seem to consist of not longing for the things that would make us happy.—A. Life.

SENATOR LORIMER.

Roosevelt Objected to Him Attending Chicago Banquet.

THOUSANDS AT THE
DEPOT TO MEET HIMRoosevelt's Plan to Quietly Enter
Chicago Upset.

Chicago, Sept. 9.—Colonel Roosevelt's plans to delay any public greeting on his arrival in Chicago until he made his appearance at an informal reception of the Hamilton club went much amiss, when the special train bearing his party reached the Wells street station. Although the club committee had been asked not to arrange a reception at the depot, and stress had been laid upon the fact that the reception was to be held later, a crowd numbering several thousand flocked around the train, filling the street and cheered lustily when the former president made his appearance.

Colonel Roosevelt's objection to the presence of the Illinois senator, William Lorimer, at the Hamilton club banquet had caused a tremendous interest and scores hurried to the railroad station after reading the announcement in newspaper extras.

These men called loudly for a speech, but Colonel Roosevelt hurried to a waiting automobile. Here he stopped long enough to tell the crowd how glad he was to return to this city, and what a great time he had been having on the trip. Then the automobile, preceded by a police automobile bearing Chief of Police Steward and a special police guard, hurried to a hotel.

At the hotel he was the guest of honor at an elaborate banquet given by the members of the Hamilton club of Chicago. He was greeted by an assemblage of 1,100 diners, among whom were several United States senators, governors of states and other notables. Hundreds of people who had been unable to obtain seats at the banquet thronged the corridors of the hotel and the balcony of the gold room, in which Colonel Roosevelt spoke, waiting for a chance to hear or see the former president.

Following the banquet Colonel Roosevelt was escorted to a large reception in the Elizabethan room of the Congress, which had been transformed into a representation of an African jungle. Colonel Roosevelt was frankly pleased with the decorative innovation.

POTATO CROP VERY SMALL

Will Be About Thirty-five Per Cent of Normal Yield.

Moorehead, Minn., Sept. 9.—The enormous yield of potatoes, usually marketed from the big potato belt in Clay county, will be greatly reduced this year, and revised figures to date say that hardly more than 35 per cent of a normal crop can be expected, and this means that the output will be many hundred cars less.

A representative of a combination of Eastern dealers put the total yield of the county at 50 per cent of a normal crop, but he had only used the fields of the biggest of the growers as a basis for his estimate. He had omitted the smaller fields, which are a factor in determining the total yield of the county. Potato men say the "spuds" are still growing and the digging will be delayed as long as it is safe to do so.

NEBRASKANS HUNT PEARLS.

Finding of \$500 Specimen in Elkhorn River Starts Search.

The pearl fishing craze has struck Stanton, Neb. Merchants are leaving their stores, professional men their offices and farmers their fields to hunt pearls in the Elkhorn river.

A few days ago Herman Seidel was fishing in the river for pike. Running out of bait, he opened a clam shell in order to get the clam and use it. As he pried the shell apart a pure white pearl almost as large as a hickory nut flashed before his eyes. He stopped his pike fishing and went to hunting clams, with the result that in the afternoon he secured two more pearls, somewhat smaller than the first one.

Seidel sent the largest pearl to a wholesale jewelry house in Omaha and has received word that it is worth \$500. The result of this find has started everybody to hunting pearls.

THREE KILLED
AND NINE HURT

DIATOMITE.

Infusorial Earth Formed by Bodies of Minute Shellfish.

Diatoms are tiny creatures that multiply very rapidly until they form a scum upon the surface of the water in many parts of the world. They are rarely more than one-hundredth part of an inch in diameter and often considerably less. Their shells are composed of silica, and these shells are well known to the microscopist on account of their great beauty.

When the little creatures die the shells sink to the bottom of the stream or pond, where they form a kind of siliceous mud, and there are vast deposits of this material in various parts of the earth. This infusorial earth, as it is called, has been christened diatomite, and it is being used for a variety of purposes under the name kieselguhr. It is employed as a vehicle or absorbent for nitroglycerin and the resultant paste is dynamite. Diatomite is an excellent nonconductor of heat, and in this capacity it is used for filling the hollow interiors of the walls of safes, as a lining for stoves and furnaces and as a covering for steam pipes and boilers. For such purposes as these it has an advantage over asbestos in the matter of price and also of weight.

It can be made into bricks or slabs by the addition of a small quantity of lime or clay, and these bricks can be raised to a white heat without showing any signs of fusion.

Diatomite occurs in great quantities in the United States, in Prussia, in parts of Scotland, in Canada and to a lesser degree in Western Australia and New Zealand.—Harper's Weekly.

A Successful Guest.

"Well, Bill, how did you come out with the trust company?"

"Fine."

"They accepted your offer, did they?"

"Yes."

"What kind of a job did they give you?"

"Didn't give me any."

"Then how did they accept your proposition?"

"I offered them the refusal of my services, and they accepted it—refused 'em right off the handle."—Harper's Weekly.

Explosion Occurs on Battle-
ship North Dakota.

HAPPENED FAR FROM SHORE

Big Warship Was on the Way to Hampton Roads When Accident Occurred and for Several Hours Wild Rumors Were in Circulation Ashore. Admiral Schroeder Reports on Disaster.

Fort Monroe, Va., Sept. 9.—Another of those tragedies which go to show that the sailor offers his life to his country in time of peace as well as in time of war was enacted on the dreadnaught North Dakota, when, about twelve miles from Old Point in lower Chesapeake bay, an explosion of fuel oil and an ensuing fire cost the lives of three men and more or less serious injuries to nine others, including Chief Lieutenant Orin G. Murphy.

The accident happened far from any shore, and for several hours the wildest rumors circulated through the communities; that having widest circulation being to the effect that the Delaware, sister ship of the North Dakota, had been blown up.

The official report of Admiral Schroeder to the navy department named the following dead and injured in the fire on the battleship North Dakota:

The Dead—Joseph W. Schmidt, coal passer, enlisted at New York Oct. 25, 1909; Robert Gilmore, coal passer, enlisted at Newport, R. I., January, 1910; Joseph Strait, coal passer, enlisted at Grand Rapids, Mich., June, 1907.

The Injured—Chief Machinist E. W. Andrews, New York; Machinist T. C. McDonough, Brooklyn; Charles C. Roberts, machinist's mate, enlisted at Norfolk, Va.; Sebastian J. Wittwer, fireman, enlisted at Philadelphia; James A. Brady, fireman, enlisted at New York; Leo F. Plorek, fireman, enlisted at Chicago; John G. Morrison, fireman, enlisted at Mare Island, Cal.

Rear Admiral Seaton Schroeder, commanding the Atlantic fleet, made the following statement of the accident:

Statement by Admiral Schroeder. "Between 10:30 and 11 o'clock a. m. oil from room No. 3 in the North Dakota caught fire while the first squadron of the Atlantic fleet was making passage from the Southern drill grounds to Hampton Roads. Under a request from the commander of the North Dakota the commander-in-chief of the fleet immediately ordered the North Dakota to leave the fleet formation and the battleship New Hampshire put near to render assistance in case it could be of service.

"No assistance was necessary and by 11:30 o'clock the fire on the North Dakota was under control.

"It has not yet been ascertained how the fire started, although it is believed that the disaster was not due to any carelessness of the men on the North Dakota. A board of inquiry was named to investigate the accident, consisting of Captain C. A. Core of the Delaware, senior officer; Lieutenant Commander C. V. Price of the Delaware and Lieutenant Commander A. M. Proctor of the Connecticut. This board will thoroughly look into the cause of the explosion.

After naming the dead and injured, stating that the three who were dead were "killed outright," Admiral Schroeder added:

"The injured men are all expected to recover. Chief Lieutenant Orin C. Murphy was in the fire room at the time of the accident and was burned, but not seriously.

"The commander-in-chief immediately upon the anchoring of the squadron proceeded on the supply tender Yankton to the North Dakota to personally attend the operations. The fire was completely under control before he arrived.

"The North Dakota shortly after the accident anchored off Thimble Shoal lighthouse. The wounded men, who are severely but not seriously burned, were removed from the North Dakota to the hospital ship Solace."

Didn't Like the Lackeys.

The late John Henneage Jesse, the well known author, had an aversion, amounting to a positive "phobia," for the British Jesuits. He has been known to stand in St. James' street on a drawing room day, at the edge of the curb, and with the end of his stick, which he dipped into the road puddle, dab the immaculate stockings of the passing lackeys, who, as he well knew, dare not move from their stations, accompanying the act with much opprobrious language.

LOCAL NEWS NOTES

S. E. Atkin, of Duluth, is in the city.

Dr. J. L. Camp returned last night from St. Paul.

O. P. Erickson went to Little Falls this afternoon.

Dr. C. A. Nelson went to Backus this afternoon.

Flavorine—Vanilla flavor. Maple-O—Maple flavor. 30tf

J. A. McLellan went to Minneapolis this afternoon.

Prof. E. Clifford Roberts went to Staples this noon.

Mrs. E. H. Russell went to Merrillfield this afternoon.

I. W. Bouck, of Royalton, arrived in the city yesterday.

Miss Augusta Sterling went to Pine River this afternoon.

Heath & Milligan paints are best. We sell them. D. M. Clark & Co. 30tf

Mrs. L. D. Beach, of Northome is visiting Mrs. W. H. Durham.

Rev. Joseph R. Alten returned today from a visit at Cass Lake.

Ezra Smith left this afternoon for Minneapolis, going by automobile.

Ed. Peters, of the Kimball Piano Co., went to Deerwood this afternoon.

Arthur Lagerquist was among the state fair visitors who returned last night.

Miss Beatrice Marquis, of St. Paul, arrived this afternoon to visit Mrs. W. S. Orne.

See D. M. Clark & Co. for plumbing and heating. 31tf

Dr. K. H. Hoorn came up from the twin cities last evening after a day at the fair.

James T. Hale and Paul M. Hale, of Deerwood, are transacting business in the city.

Al LeLonde left for St. Paul this afternoon by automobile in company with Benj. Bemis.

Ernest Ritari returned this noon from a business trip to Crosby and the new town of Ironton.

Store your household good with D. M. Clark & Co. 31tf

Mrs. E. S. Koop returned this noon from a visit at Duluth. She will leave soon for a visit at Omaha.

Mrs. H. M. Edgerton, daughter of Mr. and Mrs. J. C. Barber, was taken to St. Joseph's hospital yesterday.

Clifton Albright, who had charge of the Crow Wing county exhibit at the state fair, came up last night.

Mr. and Mrs. Alla Cuskey and Mr.

and Mrs. G. J. Kroes went to Merrillfield this afternoon on a short outing.

Schmidt's bottle beer, famous for quality. Order a case. Telephone 164, John Coates Liquor Co. 282tf

Rev. Charles Fox Davis returned today from Duluth where he officiated at the Perault-McFadden wedding.

Mr. and Mrs. J. Johnson and Mrs. P. Gaffney left this afternoon for Cuyuna where they will visit the iron mines.

Miss Blanche Russell entertained at "500" on Wednesday evening in honor of her friend, Miss Grace Reynolds, of Mankato.

L. W. Porter, of Crow Wing, is in the city today and said they had a heavy frost in their part of the country last night.

Now is the time to buy that lawn mower and lawn sprinkler. D. M. Clark & Co. 30tf

Forest E. Baldwin, the day clerk at the Ransford hotel, went to St. Paul this morning to spend a few days and visit the fair.

Mrs. Mary Billings, a former resident of Crow Wing county, but who now resides at VanCouver, B. C., is visiting friends in the city.

Walter Koop's team of all stars is scheduled to play "Tub" Low's team of fire-eaters a warm game Saturday morning at nine o'clock.

F. E. Anderson returned from St. Paul last night after spending a week in the twin cities taking in the attractions during fair week.

Murallo, the sanitary wall finish, in all colors, is cheaper and better than wall paper. D. M. Clark & Co. 30tf

Mr. and Mrs. N. H. Ingersoll came up last night from St. Paul, where they had been in attendance at the conservation congress and the state fair.

W. C. Cromett and Bill Mattson Saturday loaded a car of wheat which they shipped to the Hays-Weaver Milling Co. at Brainerd.—Pine River Sentinel.

My new electric vacuum cleaner is ready for your work. Phone 261. Work done promptly. W. E. Lively. 75-tf

Mr. and Mrs. Levi Bailey and Mr. and Mrs. B. Rathvon, of Crow Wing, were in the city today on their way to Deerwood on business and to visit friends.

Mr. and Mrs. Larson, who visited the state fair and also spent a day with Mr. and Mrs. Alla Cuskey, returned this afternoon to their home in Aitkin.

Mr. and Mrs. J. G. Heald, of Hubert, accompanied a relative, Mrs. Amanda Nichols, to Brainerd where Mrs. Nichols took the train for Cleveland, Ohio.

Mrs. W. E. Barker, of 8th street north, has received a message announcing the death of her sister, and she left yesterday for Mendota, Ill., to attend the funeral.

Mrs. Jennie H. Loder will speak Sunday morning at the Swedish Baptist church, 10th St. So. The subject will be about the mission work in India. All are welcome.

Miss Marie Brady, of Brainerd, arrived Saturday and spent Sunday with Mrs. R. D. Miller. She went from here to Grand Forks, N. D., to teach school.—Staples World.

Dr. and Mrs. Werner Hemstead and daughter, returned last night from St. Paul where they had been in attendance at the conservation congress and the state fair.

See Fisher-Vaughn Co. for all kinds of coal at reasonable prices. 69tf

E. W. Dunn, of the north side, claims his garden is being molested by boys and says there will be trouble if the depredations in his garden truck are not stopped.

Rev. J. J. Parish, of Mora, is taking a ministerial examination, post graduate work, today, with Rev. Charles Fox Davis, of the First Methodist church, conducting the examination.

Miss Clara Pepin, cashier in Miller's grocery department, is enjoying a two week's vacation and will spend a week of it with friends at Brainerd. She left for that place yesterday.—Staples World.

H. G. Butterfield, of Allen town, was a visitor in town Monday night on his way to Brainerd to transact business matters before the Crow Wing county commissioners.—Pine River Sentinel.

Mr. and Mrs. D. P. Barnes and daughters, the Misses Helen and Mary, who have been spending the summer at Hubert, passed through the city today on their way to their home at Glenullin, N. D.

The regular monthly meeting of the W. C. T. U. will be held next Tuesday afternoon at three o'clock at the residence of Mrs. W. A. M. Johnston. All members are requested to be present as business of importance is to be transacted.

A. J. Halsted, of the Tribune, accompanied by Miss Flo Halsted and Leslie Halsted, left this afternoon for St. Paul and will go from there to Wheeling, W. Va., where they will visit their old home during the coming three weeks.

Dr. R. A. Beise and A. M. Opsahl, of Brainerd, and Mr. and Mrs. H. C. Murphy, of Joplin, Mo., arrived Tuesday night to spend a few days here hunting birds. They went out Wednesday morning with Bill Wood as guide.—Pine River Sentinel.

Flavorine—Vanilla flavor. Maple-O—Maple flavor. 30tf

Enna Thema Emerson, aged two years and ten months, the daughter of Mr. and Mrs. Ernest M. Emerson, 924 Third Ave. N. E., died September 8th of cholera infantum. The father was a passenger brakeman on the M. & I. and was transferred lately to the Duluth-St. Paul run. The funeral arrangements will be announced later.

Ticket agent John Anderson says the fair business so far is the heaviest the N. P. railway has ever handled. Over 300 one-way tickets have been sold and a large number of round trip tickets. When the various shop passes are also taken into consideration, Brainerd probably has sent a larger quota or percentage of its people to the state fair than any other city of like size.

ALL HUNTERS TAKE NOTICE

Don't you know that it is cheaper to rent a gun of King for the three or four times you will go hunting this fall, than it is to tie your money up in a gun. Come in and look over my line of guns for rent. Everything from a 22-rifle to a Remington automatic. There is barely anything in the hunting line that I have not got.

KING'S SPORTING GOODS STORE

CROSBY ITEMS

Charles Lull is operating a new steam laundry.

Ed. Syverson is erecting a store building across the street from the Spalding hotel.

A roller rink is reported to be one of the amusement features of the village.

The cement sidewalks on First Ave. south have been finished and work has commenced on the walks on First Ave. north.

George H. Crosby has commenced the erection of ten five and six room cottages.

A \$10,000 school house is one of the necessary improvements planned for this growing village.

Mrs. R. R. Hudson visited in Brainerd recently. Her daughter, Miss Margaret, will attend the Brainerd high school this term.

R. R. Hudson has purchased the Snell Cross Lake stage and will run it between Crosby and Deerwood when the Crosby launch ceases its trips.

The Crosby shaft being put down by the Foundation Co., of New York, is reported to be down a depth of 70 feet.

Mrs. Jacob Wilmet, Lincoln, Ill., found her way back to perfect health. She writes: "I suffered with kidney trouble and backache and my appetite was very poor at times. A few weeks ago I got Foley's Kidney Pills and gave them a fair trial. They gave me great relief, so continued till now I am again in perfect health." For sale by all druggists. mwf-w

Watching the Head Hunters.

In the Congo one of the most industrious peoples are the Batetela. In gathering rubber they go into the forests inhabited by the Bankutu head hunting cannibals. While the men are in the forest the camp is guarded by a man who surveys the surroundings from a scaffold and by a drummer. When the Bankutu are seen to approach the drummer beats the alarm and all the men return to the camp to fight. The weapons used are the spear, shield, bow and arrow. This sentinel earns in the neighborhood of \$100 of our money a year, which enables him to buy a wife.—Christian Herald.

Why She Had Not Wed.

Young Bride—You don't know how happy I am. I wonder why you never married, my dear Miss Old Maid.

Elderly Spinster—My poor child, I've always said I never could wed until I met a man different from all other men and full of courage.

Young Bride—Of course you could not. How stupid of me to know!

Going Some.

The New Hat Tree—And you're a centenarian? By George! Aside from a few cracks in your face, you hold your age mighty well. What's the secret?

The Grandfather's Clock (serenely)—I keep regular hours and always find something for my hands to do.—Puck.

Three Conditions.

Holliness is an infinite compassion for others. Greatness is to take the common things of life and walk truly among them. Happiness is a great love and much serving.—Olive Schreiner.

Contentment is always perched on the round of the ladder just above you.

A MOTHER TALKS

Mrs. Kate Halls says:—"I have kept house 15 years, am the mother of four children, and I would not keep house without Hollister's Rocky Mountain Tea." Wise woman, why? Drives away sickness, brings health and happiness to the whole family. It's the world's health preserver.

SOCIETY PLANS ADAMLESS EDEN

Entire New York Block to Be
Club For Women.

ACCOMMODATIONS FOR 1,000

Ballroom, Amateur Theater, Roof Tennis Courts, Dozen "Beau Parlors" and Free Typewriters Among Features of \$300,000 Residential Home For Bachelor Maids Soon to Be Erected.

A whole city block of women, with not a man in sight, will become an interesting reality in the "improved mode of living" in New York city early next year. Prominent New York men and women who are keenly interested in the housing problem say the new arrangement will offer accommodations for many hundreds of New York's business and professional women and students who represent the bachelor maid population of the city.

The members of the woman colony, which it is declared will be the only one of its kind in the world, will be housed in two separate buildings. The first building, which it is expected will be ready for occupancy next February, will be known as the Junior League Residential club. The second building, for which plans are now being made, will be known as the Model Kitchenette Apartments For Women.

Will House 1,000 Women.

The buildings when completed will accommodate nearly 1,000 women. The only men to be allowed on the premises will be those received socially by the young women guests. Men will be encouraged to make social calls, and provision has been made for this social feature of the club by providing a few dozen of what will be known as "beau parlors."

In the new order of things, where women will live under the same unrestrained liberty as the men and women of wealthy clubs, there will be no interfering janitress, no elevator maid, no woman superintendent or lady night watchman tiptoeing about the halls turning out the gas as a gentle hint to the young man that he had better be moving.

Miss Dorothy Whitney, daughter of the late William C. Whitney, and other well known society women who have given much time and money to philanthropy, including Mrs. Charles Rumsey, daughter of the late E. H. Harriman; Miss Harriet Alexander, Miss Lorraine Roosevelt, Mrs. Courtlandt D. Barnes and Mrs. Frederick R. Swift, with the assistance of William D. Sloane, raised about \$300,000 to erect and furnish the building.

The managers of the new enterprise say the club will not be in any way a charity, although they hope to give girls a pleasant room and good board for \$8 a week and perhaps a little less, with the additional educational, social and recreation features, for which there will be no charge.

Liberty Is Principle.

"Liberty will be the keynote of life at the new Residential club," said one of the promoters. "Young women who have the courage to come to New York to try to better their circumstances, whether to earn their own living or to study, should be given every encouragement. The social side of a girl's life has been as carefully provided for in the club as the economic one. I think the recreation one a most important feature. We will have a ballroom to accommodate as many as 600 persons. We will have tennis courts on the roof garden, and we will have a clubroom where amateur plays may be given, and we hope to interest the girls in these."

"The utility features will consist of an office room where girls may type, and a room where they have to do. There

WINTER IS COMING!

GENERAL OUTFITTERS, UNDERTAKERS and
EMBALMERS, PLUMBERS and STEAM FITTERS

will be a sewing room where the girls may make their own gowns and hats if they wish, and there will be a laundry room for their special use.
"I think one nice feature which the girls will like very much is the little pantry at the end of each hall. These will be provided with dumb waiters. If a girl wishes to make a cup of tea or a cup of chocolate all she will need to do will be to drop a coin in the slot for the gas used and she can have a cup of something warm for a small cost."

LAST BAND CONCERT TONIGHT

Brainerd City Band Plays Its Farewell Concert of the Season at Depot Park

NUMBERS ON THE PROGRAM

Air Music Has Been Much Appreciated—Will Play at the Pine River Fair

The Brainerd city band will play its last or farewell concert of the season tonight at the depot park. Air music has been much appreciated and enjoyed by the large audiences and it is a fact that well-attended night band evenings drew many people from other towns to Brainerd. It is stated by some who have seen the subject deep thought, that a large number of marriage licenses recorded in the county during the summer months was a direct result of listening to the soft, dreamy strains of the Brainerd city band. The girl in such a receptive mood that she naturally couldn't help but say, "Yes."

Among the other good things accomplished by the Brainerd city band, was its appearance in the Decoration Day and Labor Day parades. During the season the organization gave two dances and also played for two Firemen dances and the big Labor Day ball. Various candidates for office have employed the band and its music is held to be quite a factor when it comes to attracting attention and winning votes.

Its fame has spread away beyond the confines of the county of Crow Wing and a special committee of prominent citizens came down from the River the other day and engaged the band to furnish the music for the fifth annual fair of the Cass County Agricultural Association, which will be held at Pine River on September 14, 15 and 16.

The program tonight has 18 numbers and director Chris Elvig has selected some of his very best pieces. The program follows:

- Universal Peace," march.....J. B. Lempe.
Put on Your Old Gray Bonnet," march.....Percy Wenrich.
"I Make a Ring Around Rosie," barn dance.....L. P. Lampe.
When the Daisies Bloom," waltz.....Anita Owen.
Mary, You're a Big Girl Now," march.....Benhart & VanAlstine.
By the Light of the Silvery Moon," schottische.....Edwards & Smith.
My Hero," and "From the Chocolate Soldier,".....Oscar Strauss.
Bits of Remick Hits," medley overture.....arr. by J. B. Lempe.
The Two Bills," march.....Wm. Sweeney.
That Mesmerizing Mendelshon March Tune,".....Leo Friedman.
Meet Me Tonight in Dreamland," waltz.....Leo Friedman.
Silver Bell," intermezzo.....Percy Wenrich.
Melodies from Faust," overture.....Gounod.
Moving Day in Jungle Town," march.....Ayer & Burt.
The Garden of Roses,".....Dempsey & Schmid.
I'm Afraid of You," waltz.....A. Gumble.
Washington Post," march.....Soussi.
When Teddy Comes Marching Home," march.....Lee & Williams.

ANNOUNCEMENT

The management of the Grand Elks pleasure in announcing to the public, and especially to the members of the B. P. O. E., that they have secured for the balance of this week the big picture, "The Elks at Detroit." This picture should be of interest to every Elk in the city.

Reliable Medicine—Not a Narcotic

Mrs. F. Marti, St. Joe, Mich., says Foley's Honey and Tar saved her little boy's life. She writes: "Our little boy contracted a severe bronchial trouble and as the doctor's medicine did not cure him, I gave him Foley's Honey and Tar in which I gave great faith. It cured the cough as well as the choking and nagging spells, and he got well in a short time. Foley's Honey and Tar has many times saved us much trouble and we are never without it in the house." For sale by all druggists mwf

STEAMER SINKS-- 39 LIVES LOST

Milwaukee, Sept. 9.—Thirty-nine are dead as the result of the foundering of the Pere Marquette car ferry No. 18, twenty miles off Sheboygan. Only three of the crew were saved. The vessel was valued at a half million dollars. It had returned to ferry service after being used all summer as an excursion boat around Chicago, carrying thousands each day and night.

BIDS

For laying 1000 feet, more or less, of 4 inch water mains in the city of Brainerd, will be received at the office of the secretary of the Water and Light board not later than 6 o'clock p. m., Saturday, Sept. 10th, 1910. Water pipes only to be furnished by the city. The board reserves the right to reject any and all bids.

WM. NELSON,
Secretary Water & Light Board.

MUSIC AND DRAMA

At the Grand

The moving pictures at the Grand this week are of unusual interest. The Elks parade at Detroit, Mich., is presented and the films show drill teams from every large city in the country. All Elks should endeavor to see this. One little girl was disappointed because Brainerd was not shown, but this is accounted for by the fact that we did not send a team. However, if one looks closely at one of the large drill teams, one can see the Brainerd delegate, C. D. Johnson, in the vicinity of the Kentucky colonel team.

The illustrated song, "When Panisles Bloom Again," sung by Miss Winifred Smith, gained much applause.

Adair, DeArmont and company present their racing comedy drama in three scenes. It is entitled "True to a Jockey's Colors." The conversation used is typical of the track and is rather vivid at times but the underlying motive of the sketch, that one should be true to his pal, redeems it and makes it of real, warm, human interest. The climax comes in the last scene when the heroine rides the horse to victory and foils the plotters. The sketch was well received and the actors responded to several curtain calls.

"The Cow and the Moon"

If "The Cow and the Moon," the new spectacular musical extravaganza and companion play to "The Cat and the Fiddle" had no other attractiveness besides its clever book, its great cast and its wealth of startling scenery effects, it would still be a success on account of its rousing musical hits, lyrics and chorus, there being enough of the latter to

"The Moon Bride"

more than make up the ordinary musical show, but with all these essentials of success is easily established, a hit is proving to be one of the most pleasing entertainments that Mr. Sellen has as yet put forth.

Some of the big effects include the interior of a standard Pullman palace car with the entire company enroute. The approaching Locomotive, in which a full sized engine is seen coming head on; first appearing as a little speck of light on the horizon and gradually coming on towards the footlights until it appears in mammoth size. There is also a flight of an aeroplane, a mystic restaurant, with its wonderful magic waitresses; the Temple of the Sacred Cow; the Revolving Palace, with its myriads of lights, colors and golden shower, and many others too numerous to mention.

"The Cow and the Moon" is said to be a delight to the little folks, there being so many mystic events that are sure to attract the juveniles, as well as the old folks. This company will play here on Monday, Sept. 12th, at the Brainerd opera house.

When Merit Wins

When the medicine you take cures your disease, tones up your system and makes you feel better, stronger and more vigorous than before. That is what Foley's Kidney Pills do for you, in all cases of backache, headache, nervousness, loss of appetite, sleeplessness and a general weakness that is caused by any disorder of the kidneys or bladder. ENGINEER CLAUSEN SUBMITS REPORTS

Secretary Nelson, of Water and Light Board, Receives Supplemental Report

IT COVERS THE WATER SUPPLY

Blue Prints Accompanying Refer to River, Long Lake and Gilbert Lake

Secretary William Nelson, of the Water and Light board, yesterday received the supplemental report of consulting Engineer O. Clausen, of St. Paul, which was accompanied by blue prints.

The report covers eight typewritten pages but permission to publish the same was refused by the clerk until the report had first been submitted to the Water and Light board for its consideration. The blue prints refer to the river, to Long lake and Gilbert lake as sources of water supply and give all elevations necessary, so that some idea can be gained as to the work necessary if water mains were to be run from Long lake to Gilbert lake and thence under the river to Brainerd.

It is not known when the board will meet. M. T. Dunn is the treasurer of the Minnesota state fair and may remain there until Monday and probably might be compelled to stay until Wednesday. The labor of checking up the fair accounts is prodigious, especially as this is the fair with the largest attendance ever recorded. Messrs. Mahlum and Smart, the other members, are in the city. Mr. Mahlum was unable to say when the next session of the board would be held.

Chicken Stories

J. C. Herbst, of Klondyke, came to town today from a chicken hunt near his village.

Alderman Thomas G. Story arrived today from a chicken trip up the M. & I. and returned this afternoon to his home in Duluth. He got several chickens and contracted a bad case of rheumatism.

George Trent returned last night from his hunt.

Henry Grossman left this afternoon for his claim at Snowball, where he will spend a few days hunting.

W. H. Mantor, T. W. Gibson and Julius Deering returned last night from a two days hunt with 41 chickens. "If Gibson's gun hadn't balked," said Mr. Deering, "we would have come back with 60."

WALDING, KINNMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system. Testimonials free. Price 75c per bottle. Sold by all druggists. Take Hall's Family Pills for constipation.

The Children's Hour

Stella Erickson, a little pupil of Miss Mysen's, played an opening number for the children. The sewing classes are now well established in charge of Mrs. Thabes and Mrs. Cobb. A quilt is being made which will be given away here in Brainerd. More advanced work will be taken up as the children progress. There is room for a few more little girls in the classes. The Children's Hour will continue every week until the beginning of the Musical Club, when it will be held every other week.

Miss Barker and Miss Marie English have assisted often this summer. We will miss them now as they take up their work of teaching.

SENATOR NELSON ADJOURNS COMMITTEE

Special to the Dispatch:—

Minneapolis, Sept. 9.—Using his power as chairman of the Ballinger-Pinchot committee called to meet this morning at the West Hotel, Sen.

Knute Nelson adjourned the committee meeting until Tuesday, Sept. 13th, when members are directed to meet in Chicago at the Auditorium Annex hotel at ten o'clock in the morning. The minority members desired to proceed but the chairman overruled the proposal.

NEW TOWN OF "IRONTON"

Twenty-four Lots Sold on the Opening Day of New Cuyuna Range Townsite

E. A. Lamb, the Deerwood real estate man, who has charge of the sale of lots in the new Cuyuna range town, "Ironton," sold twenty-four lots on the opening day.

The new town lies near Crosby and is composed of eleven blocks and has approximately 200 lots. The purchases made so far have been mostly for residence purposes. Some business lots were also sold. Ironton Avenue will be the business street. West of it lies Irene Avenue and east of the business street are Viola and Winona Avenues. The cross streets are First, Second and Third streets. Building and grade lines have been established and everything possible will be done to make it a model town. Streets will be graded, cement walks put in and other improvements made and from the activity now apparent the claim is made that \$50,000 worth of improvements will be made this fall.

For County Attorney

So many good people have been urging me to become a candidate for county attorney that I have been made to believe that there must be some good reason for it.

My name will not be presented at the primaries but I will file by petition as an Independent Candidate, and if I get enough votes at the polls on November 8th, I will give that office the proper business administration.

The eyes of the world are upon this section of the state. Crow Wing county will make history in the next two years, and I shall be glad of the opportunity to contribute my very best endeavors.

Brainerd, Sept. 9th, 1910.
JAY HENRY LONG.

CROW WING ITEMS

The chicken season opened with more hunters than chickens.

Mrs. Clara Lee, of Marshall, is visiting her sister, Mrs. E. R. Young. R. Hodge loaded a car of cattle on Tuesday and shipped them to Solon Mills, Ill.

Mrs. R. Hodge and Miss Hattie, left for Solon Mills, Ill., Wednesday morning and will visit the state fair enroute.

R. J. Wetherbee and W. L. Jack took in the state fair on Monday. Mrs. W. L. Jack returned from a visit to the cities on Monday.

There will be a dance in Warehouse hall on Sept. 10th.

Mrs. H. Breason, of Brainerd, visited friends in Crow Wing on Friday.

Mrs. Scheibel, of St. Cloud, who has been visiting at Pete Staub's, returned to her home on Wednesday.

STANFORD GETS COLLECTION

Jarboe Library on French Revolution Goes to University.

The famous Jarboe collection of rare volumes of the French revolution has been acquired by Stanford university. This extremely valuable addition to the library takes its name from the man who originally brought the books together, John R. Jarboe, a prominent lawyer of San Francisco, many years ago.

The value of the library does not lie in its size, but in the character of its contents. The collection contains approximately 2,500 pieces. These are from almost entirely original sources and materials, most of them being extremely rare. The collection of contemporary pamphlets alone comprises 1,500 titles, and memoirs are present in surprising numbers.

The Gratitude of Elderly People

Goes out to whatever helps give them ease, comfort and strength. Foley's Kidney Pills cure kidney and bladder diseases promptly, and give comfort and relief to elderly people. For sale by all druggists. mwf

FOR REPRESENTATIVE

CHARLES W. BOUCK

Candidate for republican nomination Forty-eighth legislative district, comprising Crow Wing and Morrison counties.

He Favors:—Reapportionment. Good roads legislation. Employers' liability legislation. State inspection of seeds. Legislation inducing settlement of state lands.

If elected he pledges his best efforts to fulfill these promises.

Primaries Sept. 20, 1910.

RED TAPE EXPERT

An East Indian Clerk Who Stumped an English Official.

BEAT HIM AT HIS OWN GAME.

In the Fine Art of Circumlocution Babu Tara Chand Made His Pretentious Auditor General Appear Like a Rank Amateur—A True Story.

The government offices in Whitehall are supposed to use "red tape" pretty freely, but the supply in London is nothing to what it is in India. Let us outline briefly the true history of Babu Tara Chand, late of the subordinate branch of the Indian civil service. The story is true.

Babu Tara Chand was a deputy sub-assistant clerk in the cutcherry of a deputy collector in the Swankibagh district of southern Bengal. The inland postage rate in India at that period was three pies, or about 1 farthing, for letters weighing one tola.

One fine day when the officials had concluded the annual or biennial overhaul of the books of the cutcherry it was discovered that by some unheard-of turpitude one stamp of the value of three pies (1 farthing) had been unaccounted for. The stamp could be clearly traced to the desk and control of Babu Tara Chand. Thence it had disappeared.

Babu Tara Chand was not summarily dismissed; neither was he made the target of a criminal prosecution. Instead he received a lengthy letter on blue foolscap paper, pointing out in detail how certain property of her most gracious majesty the queen empress—to wit, one Indian postage stamp of the value of three pies—had been committed to his care on a certain date and that up to the date of writing no adequate explanation had been forthcoming of said postage stamp.

The communication fell upon the luckless Tara Chand like a bolt from the blue. It left but three courses open to him—viz:

(a) Resign from the service.
(b) Explain the disappearance of the farthing postage stamp in a manner deemed satisfactory by the auditor.
(c) Recoup the farthing.

Of these three courses it will be obvious to any person with the shallowest knowledge of the Bengali character that the third one (c) was from the outset beyond the pale of consideration. The first (a) was also too terrible to contemplate. Therefore Babu Tara Chand sat down and composed a letter which was a masterpiece in its way and in which he requested to be relieved from routine service for a period of four weeks to enable him to make such a search among the records of the department, etc., as might enable him to trace the missing stamp. This reasonable request was readily granted.

Four weeks later Babu Tara Chand applied for a further term of two weeks wherein to draw up a report upon the results of his investigations in pursuit of the errant postage stamp. This, having passed through the eighteen or nineteen different hands necessary for such an application, was in turn duly granted, and at the end of the fortnight Tara Chand submitted a report of 216 foolscap pages, explaining that, despite the most diligent efforts and inquiries on his part, he had been unable to secure the slightest clew to the cause of the deficiency.

When the department of audits and accounts had fully digested this document and presented a report of the same in official précis to the auditor general the auditor general through the secretary of the assistant auditor general of the presidency of Bengal notified Babu Tara Chand that it was not wholly satisfactory and that the circumstances bearing upon the loss of the stamp would have to be definitely explained and proved or the deficit of three pies would have to be made good.

Babu Tara Chand stuck to his guns and wrote again. He wrote many times. As often as he wrote his explanations the auditor general wrote signifying his official dissatisfaction with the same.

Eventually, one fine day about nine months subsequent to the discovery of the loss and some two years subsequent to his alleged perperation, the auditor general—his interest in the matter of a farthing postage stamp being overwhelmed in a frontier war budget—sent an ultimatum to Tara Chand. The loss of the postage stamp would have to be definitely explained or its value, the sum of three pies, be duly refunded to the treasurer of the Swankibagh district.

MEN WANTED

Salaries \$800 to Start and Promotion to \$1800

Young men who would like to enter the Railway Mail Service should prepare for the examination which will be held November 12th in several cities of this state.

An examination for post office clerks and carriers will be held during the first week of November.

In the railway mail service, salaries run as high as \$1800. The post office positions pay from \$600 to \$1200.

The Commercial Correspondence schools of Rochester, N. Y., have had remarkable success in coaching applicants for government positions.

Young men prepared by them invariably pass high and secure the first appointment. Any young man who writes to these schools will be told how he can pass the examination and secure one of these high-salaried life positions. Address, Commercial Correspondence schools, 1444 Schools Bldg., Rochester, N. Y. 77110

WANTS

Notices under this head will be charged for at the rate of one cent a word for the first insertion and one half a cent a word for each subsequent insertion, strictly cash in advance, but no ad will be taken for less than fifteen cents.

YANKEE HUSTLE WASTE OF POWER

Londoner Says Type Lacks Highest Working Efficiency.

NOT AN ECONOMICAL MACHINE

Too Much Breaking Down of Nervous Energy, Insists Owner of Thousands of Restaurants and Cigar Stores in British Isles—Admits Americans Gain Wealth in Record Time.

Joseph Lyons, one of the biggest business men in London, head of a company that operates hundreds of restaurants and thousands of cigar stores there and in the provinces, recently told a Manchester reporter that he didn't believe in what Americans call hustling.

Like Oscar Hammerstein, Mr. Lyons is versatile, for he writes novels, paints pictures and is now writing the libretto for a comic opera. He visits New York every now and then.

"The American hustler," he said, "in my opinion, does not represent the highest type of human efficiency. He wastes a lot of nervous power and energy instead of accomplishing the greatest possible amount of work for the force expended.

Hustler Not Adaptive.

"Judging the American hustler from my observation of him in his own country, where he can best be studied, I should say the American hustler shows a lack of adaptation of means to ends, because he puts more mental, physical and nervous energy into his work at all times than his work at all times demands. He does not discriminate between the vitally important and the comparatively unimportant. He insists on always working at high pressure.

"Regarded as a machine, he is not an economical one. He breaks down too often, and has to be laid up for repairs too often. He tries to do everything too fast. He ruins his digestion by eating too fast, he plays havoc with his nerves by trying to work too fast."

"Then you don't believe in working at high pressure?"

"Not as that term is understood in America. The man who learns how to organize himself, as well as his business, has no need to be 'rushed.' Big things can be done more effectively and expeditiously when they are done quietly than when they are done busily.

Too Much Work Done.

"Hustling in America too often means, I think, doing things that would be as well done, or better done, if left to some employee to do. No man succeeds in a big way unless he surrounds himself with men who can do many of the things that have to be done in his business better than he can do them himself. And he should let men do these things, and not meddle with them needlessly."

"Then you think that Americans would accomplish more of they hustled less?"

"I would not go so far as to say that they would actually make more money if they hustled less. When it comes to making money Americans hold all the records. More colossal fortunes are made there than anywhere else. But I will say that if Americans hustled less they would probably make pretty near as much money as they do now—quite enough, anyhow—and would certainly get a much better time out of life."

CLOUDS HIDE WHITE ISLAND.

Sulphuric Steam Causes Strange Freak Near New Zealand.

White island, thirty miles to the northeast of New Zealand, is perhaps the most extraordinary island in the world. It is an enormous mass of rock nearly three miles in circumference, rising 900 feet above the sea, and is perpetually enveloped in dark clouds, which are visible for nearly 100 miles.

The island consists almost entirely of sulphur, with a small percentage of gypsum. Some years ago an attempt was made to float a company to work the sulphur, which is of high quality, but sufficient capital was not subscribed. Therefore the export of sulphur from White island is still very small.

In the interior is a lake fully fifty acres in extent, the water of which has a temperature of 110 degrees F., and it is strongly impregnated with acids. On one side of this lake are craters, from which steam escapes with great force and noise. This steam and the vapor from the lake form the dark cloud that envelops the island.

FIRES THAT ARE ASLEEP.

A Great Range of Volcanoes in the Heart of Africa.

It is not very generally known that right in the heart of Africa at the southern end of Lake Albert Edward is a great range of volcanoes. They are eight in number, and though it is true that, unlike Kilauea, they carry no permanent snow, the highest peak is over 14,000 feet in height. These volcanoes are particularly interesting on account of their comparative newness. Running through the middle of Africa there is a trench many hundred miles long, in which lie the great lakes Albert, Albert Edward, Kivu and Tanganyika.

Not very many thousands of years ago the volcanoes, generally called Mfumbiro, burst up through the middle of this trench and made a dam across it, with the result that some of the water which formerly flowed into Lake Albert Edward and so into the Nile was cut off and a lake was formed behind the dam. As times went on the waters in the lake which is now called Kivu rose higher and higher until, not being able to flow over the barrier of the volcanoes, they formed the Rusizi river, which runs the other way into Tanganyika, about a hundred miles distant. Of the eight volcanoes only two show signs of activity at the present time in the form of thin wisps of steam which may occasionally be seen, but a vast plain of lava, with a wide black stream curling through its midst, showed where a formidable eruption had taken place only two or three years before our visit. There are hot springs scattered here and there, and we felt slight shocks of earthquakes once or twice, so it is not safe to say that the Mfumbiro volcanoes are extinct.—Wide World Magazine.

Curious Baths in Penang.

One of the many things that strike the tourist as curious at Penang is the type of baths with which the hotels are provided. Penang is in the Straits Settlements, a British crown colony in the Malay peninsula, deriving its name from the straits of Malacca, which form the great trade route between India and China. From each of the first class rooms opens a dark, cement paved, damp smelling little room which serves as the bath. In it is an immense jar of porous brown earthenware about five feet high, nearly three feet in diameter in the middle and but one and a half feet in diameter at the top. It stands huge and graceful of outline, but dark and uninviting, and is full to the brim with water, not, however, to get into. Near it are a supply of soft soap and a long handled quart dipper. The proper procedure is to soap the body well, then throw several dippers of water over it, repeating the process until satisfied. There is water enough to keep it up for an hour or so, and there is a huge crash towel as large as a sheet to wrap up in when the bath is over.—Detroit News-Tribune.

His Nasal Obligate.

"Mr. Skinnerhorn," inquired the landlady, "how did you sleep last night?"

"Like a top," answered the guest.

"I thought so. I could hear you—aw—humming all night long."—Chicago Tribune.

COLLEGE OF ST. THOMAS St. Paul, Minn.
Under the control and direction of Archbishop Ireland. A Catholic Ministry College, situated in the heart of the city, and extensive grounds near the banks of the Mississippi. Ranked by the War Department among the ten military colleges of the United States distinguished for discipline and efficiency. Combines careful mental, moral, and religious training with systematic physical development. Preparatory, High School, Collegiate and Commercial Courses. Over six hundred students, representing seventeen states, registered last year. For illustrated catalog apply to THE PRESIDENT.

What Your Tailor?
FABRIC and style are not all that produce satisfactory clothes—your shape must be artistically tailored into them during the making; then they'll fit and serve you well—that is, if made by **Ed. V. Price & Co.** MERCHANT TAILORS CHICAGO
Better have us show you their magnificent Fall Woolens, and send them your measure today. We can save you 1/3 to 1/2 on tailor's ordinary prices and satisfy you completely. Why not, then, have clothes made as you want them, and delivered when you want them?
